

World Anti-Doping Agency

Accreditation plays a pivotal role in supporting The World Anti-Doping Agency's (WADA) mandate to monitor compliance to the WADA International Standard for Laboratories (ISL) in the fight against doping in sport.

Laboratories that wish to perform anti-doping analyses of sport samples under the World Anti-Doping Code must achieve and maintain accreditation from WADA. Collaboration between WADA and ILAC ensure that assessment of laboratories can be carried out to the WADA ISL standard and ISO/IEC 17025 concurrently. This ensures that stakeholders, including athletes, sport organizations, governments and the general public can trust the results from accredited laboratories.
